PROFESSIONAL SUMMARY

Software Engineer and front-end specialist with 18+ years of experience building scalable, accessible, and high-performance web applications and digital products.

Throughout my career, I have worked on complex digital projects for government institutions, international organizations, NGOs, and the private sector, including the European Union Intellectual Property Office (EUIPO) and the Brazilian Judiciary (TJTO).

My work has been recognized through national and international design awards, including an iF Design Award Gold, Anthem Award Silver, Brasil Design Awards, Bienal Iberoamericana de Diseño, and Design for a Better World Awards. These recognitions span digital products, UX/UI, accessibility, data visualization, inclusion, and social impact.

TECHNICAL SKILLS

React, Next.js, Vue, Nuxt, TypeScript, Tailwind CSS, Material UI, Vite, Node.js, PHP, Joomla, JavaScript, HTML5, CSS3, Node.js, PHP, Joomla, MySQL, Git, Agile, Scrum, REST APIs, Responsive Web Design, Web Accessibility, WCAG, Data Visualization, UI/UX Implementation, Front-end Architecture, CI/CD

WORK EXPERIENCE

Axians

Senior Software Engineer · Front-end Specialist

Spain · remote | 2026 - Present

- Working as an independent Software Engineer and Front-end Specialist at Axians, assigned to the European Union Intellectual Property Office (EUIPO) project.
- Contributing to the development and evolution of large-scale web applications supporting intellectual property services across European national and regional offices.
- Responsible for implementing, enhancing, and maintaining critical Front Office interfaces, with a strong focus on accessibility, performance, scalability, usability, and code quality.
- Collaborating within multicultural Agile teams, participating in technical discussions, architectural decisions, code reviews, and continuous improvement initiatives.

Technologies: React, TypeScript, Material UI, React Context API

Vex Tech

Software Engineer · Front-end Specialist

Portugal · remote | 2025 - 2026

- Worked as a Software Engineer and Front-end Specialist on the European Union Intellectual Property Office (EUIPO) project, contributing to the development and maintenance of large-scale web applications for European intellectual property services.
- Responsible for implementing and maintaining Front Office interfaces, focusing on accessibility, performance, scalability, usability, and code quality.
- Collaborated with multicultural Agile teams, contributing to technical discussions, code reviews, problem solving, and continuous improvement initiatives.

Technologies: React, TypeScript, Material UI, React Context API

Café.art.br

Software Engineer · Front-end Specialist

Rio de Janeiro, BR · remote | 2022 - Present

- At Café com Marketing, I was responsible for transforming creative concepts and design prototypes into modern, scalable, and high-performance web applications.
- Working across the full frontend development lifecycle, I built responsive interfaces with a strong focus on user experience, accessibility, performance, and maintainable code. I collaborated closely with designers, marketers, and stakeholders to deliver digital products tailored to diverse audiences and business goals.
- Throughout this role, I contributed to a wide range of websites, landing pages, and custom web solutions, leveraging modern frameworks and tools to ensure fast, reliable, and visually engaging experiences.

Technologies: React, TypeScript, Next.js, Vite, Vue.js, Nuxt, Tailwind CSS, JavaScript, HTML, PHP

TJTO — Court of Justice of Tocantins

Software Engineer · Front-end

Palmas, TO | 2010 - Present

- Since 2011, I have been working as a Front-End Developer in the Judiciary, leading the design and implementation of all institutional websites with a strong focus on performance, accessibility, and user experience. I specialize in developing custom, responsive templates using Joomla as the CMS, ensuring consistency and scalability across a diverse range of projects.
- One of the most significant platforms under my responsibility is the TJTO portal (tjto.jus.br), which receives an average of 8,900 daily visits. I've contributed to the platform's long-term stability by creating dedicated hotspots, enhancing the UI architecture, and implementing front-end performance optimizations to ensure fast load times, intuitive navigation, and cross-device compatibility.
- Beyond routine maintenance, I actively drive the front-end evolution of these platforms—developing new visual components, improving responsiveness, and refining the user interface to align with accessibility standards and evolving user needs.

Technologies: Joomla, HTML, CSS, JavaScript, TypeScript, React, Node.js, PHP, Tailwind CSS, MySQL, Git

Web Success Ltd

Co-founder

Dublin, Ireland | 2020 - 2022

- Being part of the foundation of a technology company in Dublin was an enriching and challenging experience. We had the opportunity to build a solid client base, offering a wide range of services, including technical consultancy, website development, and the creation of custom small-scale systems.
- I was responsible for managing the technical side of the company, leading talent recruitment and project management, ensuring the delivery of high-quality solutions.
- My partner focused on client relations and administrative matters, allowing the company to operate smoothly and efficiently.

Technologies: React, Node.js, PHP

42 Bar & Board Games

Co-founder · Creative lead

Palmas, TO | 2017 - 2020

- As a co-owner of 42, I had the extraordinary opportunity to work across nearly every aspect of the business. Some of the key responsibilities I took on include:
- Bar Management | Brand Strategy and Positioning | Customer Relations | Corporate Marketing | Team Training and Development | Menu Design (for both Kitchen and Cocktails) | Event Production and Coordination | Quality Assurance and Control.
- My expertise in technology, design, and marketing was instrumental in creating the bar's visual identity, as well as all of the advertising materials we used.
- I managed customer relations on social media, and I was also responsible for planning and executing the bar's campaigns and events.

PRTE — Technology & Solutions

Frontend Developer

Palmas, TO | 2014 - 2016

- At PRTE - Educational Technology and Solutions, I worked as a front-end developer, specializing in visual design and website development. During my tenure, I focused on creating responsive and innovative web solutions tailored to client needs and industry trends.
- My responsibilities included developing and implementing intuitive and visually appealing user interfaces; creating responsive designs to ensure a consistent user experience across various devices; collaborating with design and development teams to build functional and visually impactful websites; and utilizing technologies such as HTML5, JavaScript, and CSS to develop and optimize web pages.
- These experiences provided me with a strong understanding of front-end development best practices and honed my ability to deliver high-quality projects.

Technologies: HTML, CSS, JavaScript, PHP

Microlins

Computer instructor

Palmas, TO | 2007 - 2010

- During my time as a computer instructor at Microlins, I taught a broad range of courses, including Windows, Microsoft Office (Word, Excel, PowerPoint), Photoshop, Corel Draw, PageMaker, HTML, CSS, Dreamweaver, Fireworks, and Flash with ActionScript, as well as website design and creation.
- In addition to teaching, I developed and managed the Microlins newsletter and created the website www.microlinspalmas.com.br. I was also responsible for developing internal campaigns to promote the brand and services, and for creating the Microlins model company, which served as a reference for other franchises.
- These experiences provided me with a solid foundation in web design and development.

Technologies: HTML, CSS

Cartório Moromizato

IT support specialist

Palmas, TO | 2009 - 2009

- At Cartório e Tabelionato de Protesto Moromizato, I was responsible for maintaining and supporting the office's computers, as well as providing network support. I also developed advertising materials and created internal campaigns to promote the office's services.
- A key achievement was the development of the website www.cartoriomoromizato.com.br, which enhanced the organization's online presence.
- These experiences provided me with valuable skills in technical support, web development, and promotional material creation.

Q.I. Informática

Computer instructor

Palmas, TO | 2007 - 2008

- As a computer instructor at Q.I. Informática, I taught a variety of courses, including AutoCAD, Photoshop, Corel Draw, PageMaker, HTML, CSS, Dreamweaver, Fireworks, Flash with ActionScript, and website design and creation.
- These courses covered a range of topics from graphic design and layout creation to web development and interactive functionality. My role involved developing educational materials, monitoring student progress, and adapting content to meet market needs.

To Online — Performance Marketing

Frontend Developer

Palmas, TO | 2007 - 2007

- As a front-end developer at To Online - Marketing de Resultados, I was involved in visual design and website development, contributing to the creation of over 30 projects.
- My role included developing engaging and functional interfaces using technologies such as HTML, CSS, and JavaScript to ensure a high-quality user experience. I played a key role in executing web design and development projects, aligning them with marketing strategies and client objectives.

Technologies: HTML, CSS, JavaScript

TEMA Informática

Instructor · Pedagogical assistant

Niterói, RJ | 2005 - 2006

- As a computer instructor at TEMA INFORMÁTICA, I taught a wide range of courses including AutoCAD, Humanization (AutoCAD-Corel), Computer Assembly and Maintenance, Structured Network Cabling, Linux (Debian - Kurumin), OpenOffice (Writer, Calc, Impress), Windows, Microsoft Office (Word, Excel, PowerPoint), Photoshop, Corel Draw, PageMaker, HTML, CSS, Dreamweaver, Fireworks, Flash with ActionScript, and Website Design and Creation.
- In addition to my teaching role, I served as a pedagogical assistant, responsible for standardizing teaching methods across the 6 branches of TEMA. I developed the course plan for 2007 and revised the educational materials for that year, ensuring the quality and consistency of the educational content throughout the network.

SELECTED PROJECTS

Tramos do Futuro 2026

Fundação Itaú | 2026

Contributed to the launch of Tramos do Futuro 2026, an initiative by Fundação Itaú that helps young people explore the careers and opportunities shaping the future of work.

Technologies: Nuxt, Tailwind CSS

Front-end role: I built the frontend with Nuxt and Tailwind CSS: a modern, responsive, and accessible experience that brings together event information, activities, speakers, and educational content.

EUIPO Digital Platform

Axians · European Union Intellectual Property Office | 2025 - Present

Worked as a Software Engineer and Front-end Specialist on the European Union Intellectual Property Office (EUIPO) project, contributing to the development and maintenance of large-scale web applications for European intellectual property services.

Technologies: React, TypeScript, Material UI, React Context API

Front-end role: Responsible for implementing and maintaining Front Office interfaces, focusing on accessibility, performance, scalability, usability, and code quality.

Abortion Landscape in Brazil

Instituto AzMina | 2023

Developed the frontend for the Aborto no Brasil platform, an initiative by Instituto AzMina that provides data, research, and educational resources about access to legal abortion services and reproductive healthcare in Brazil.

Technologies: HTML, Tailwind CSS, JavaScript

Front-end role: Using HTML, Tailwind CSS, and JavaScript, I built a responsive, accessible, and user-friendly interface designed to present complex information through clear navigation and an intuitive user experience.

Futuro Exterminado

Instituto Fogo Cruzado | 2024

Developed the frontend for Futuro Exterminado, a data-driven platform by Instituto Fogo Cruzado that documents and visualizes the impact of armed violence on children and adolescents in the metropolitan region of Rio de Janeiro.

Technologies: Nuxt, Tailwind CSS, JavaScript

Front-end role: Built with Nuxt and Tailwind CSS, I focused on creating a responsive, accessible, and high-performance user experience capable of presenting complex datasets through intuitive navigation, interactive maps, and meaningful data visualizations.

Pediatric Oncology Panorama

Instituto Desiderata | 2025

Developed the frontend for the Pediatric Oncology Panorama, an initiative by Instituto Desiderata focused on childhood cancer awareness, early diagnosis, and pediatric healthcare in Brazil.

Technologies: Nuxt, Tailwind CSS, JavaScript

Front-end role: Using Nuxt and Tailwind CSS, I built a responsive, accessible, and high-performance experience that presents indicators, research, and educational resources through a clear interface.

Instituto Desiderata

Instituto Desiderata | 2024

Developed the frontend for the Instituto Desiderata website, using Nuxt and Tailwind CSS to create a modern, accessible, and responsive digital experience that strengthens the organization's presence.

Technologies: Nuxt, Tailwind CSS, JavaScript

Front-end role: The site communicates the institute's mission, initiatives, and educational resources through a clean interface, intuitive navigation, and a user-centered experience.

Digital Citizenship Curriculum

SaferNet Brazil | 2024

Developed the frontend for the Digital Citizenship platform, an initiative by SaferNet Brasil that provides educational resources to help schools promote digital citizenship, online safety, and the responsible use of technology.

Technologies: Vue.js, Tailwind CSS, JavaScript

Front-end role: Using Vue.js and Tailwind CSS, I built a responsive, accessible, and high-performance user experience focused on making educational content easy to navigate for teachers, students, and schools across different devices.

Health Financing Progress Matrix

World Health Organization (WHO) | 2024

Developed the frontend for the Health Financing Progress Matrix (HFPM), a platform developed for the World Health Organization (WHO) that supports countries in evaluating and strengthening their health financing systems to advance Universal Health Coverage (UHC).

Technologies: Nuxt, Tailwind CSS, JavaScript

Front-end role: Using Nuxt and Tailwind CSS, I built a responsive, accessible, and high-performance user experience designed to present health financing frameworks, assessments, and policy resources through a clear and intuitive interface.

InovaHC

Hospital das Clínicas — USP | 2024

Developed the frontend for the InovaHC website, the Innovation Hub of Hospital das Clínicas, University of São Paulo (USP), creating a modern digital experience that supports healthcare innovation, digital transformation, and research initiatives.

Technologies: WordPress, Tailwind CSS, JavaScript

Front-end role: Using WordPress and Tailwind CSS, I built a responsive, accessible, and high-performance interface designed to showcase innovation programs, research projects, partnerships, and educational initiatives through clear information architecture and intuitive navigation.

WePlan Forests

IIS · FERI | 2023

Contributed to the frontend development of WePlan Forests, a decision-support platform that helps governments, researchers, and environmental organizations plan large-scale forest restoration using spatial data and scientific modeling.

Technologies: Tailwind CSS, JavaScript

Front-end role: The project transforms complex environmental datasets into intuitive, interactive interfaces, enabling users to evaluate restoration scenarios based on biodiversity, carbon sequestration, and cost-effectiveness. The challenge was delivering a user experience that simplifies data exploration while maintaining performance and usability.

Transparência Brasil

Transparência Brasil | 2023

Developed the frontend for Transparência Brasil, using Nuxt and Tailwind CSS to build a modern, responsive, and accessible platform that promotes transparency, accountability, and civic engagement in Brazil.

Technologies: Nuxt, Tailwind CSS, JavaScript

Front-end role: The platform brings together research, public policy content, and data-driven resources through an intuitive and high-performance user experience. I focused on building a scalable frontend architecture that makes complex information easy to navigate while ensuring accessibility and responsiveness across devices.

TJTO Portal

Court of Justice of Tocantins | 2011 - Present

Since 2011, I have been part of the digital transformation of the Court of Justice of the State of Tocantins (TJTO), contributing to the development, maintenance, and continuous evolution of one of the state's largest public web ecosystems.

Technologies: Joomla, PHP, JavaScript, Tailwind CSS, HTML, CSS, MySQL

Front-end role: Working with a custom Joomla architecture, I have been responsible for building institutional portals, campaign websites, internal solutions, and new digital services that support both citizens and court employees. Beyond developing new features, I have modernized legacy systems, improved content management workflows, optimized performance, and helped maintain a reliable platform that serves thousands of users every day.

EDUCATION

Universidade Federal do Tocantins (UFT)

Master, Computational Modeling of Systems

2018 - 2020

FLAG

Professional Full Stack Web Development

2024 - 2025

Universidade Estadual do Tocantins (UNITINS)

Bachelor, Information Systems

2016 - 2020

Universidade Federal do Tocantins (UFT)

Bachelor, Arts

2012 - 2017

CERTIFICATIONS

- FLAG — Professional Full Stack Web Development (2024-2025)
- Frontend Frameworks — React
- Workshop: MongoDB, Node.js, Express.js
- Workshop: SASS, JavaScript
